"Health in the Nuclear Age" is the theme of the current special issue of *Mobius,* the quarterly journal for continuing education in health sciences sponsored by the Institute for Health Policy Studies.

The special issue includes articles addressing the controversies inherent in the concept of health in the nuclear age and the resources for use in designing continuing education programs—with perspectives ranging from the scientific to the aesthetic.

A major theme in the issue is the need for health care professionals to assume responsibility for urging that nuclear weapons not be used to resolve conflicts, since there can be no adequate medical response to nuclear war.

UCSF authors contributing to the special issue include Gert Brieger, MD, PhD, professor and chair of the Department of the History of Health Sciences; Neal Halfon, MD, pediatrician and Robert Wood Johnson Clinical Scholar; Amy S. Kelly, PhD, assistant clinical professor of medicine and health policy scholar; and Mary Neal, MS, doctoral candidate in medical anthropology.

Mobius recently was honored with designation as the official journal of the

The Office of Public Service Programs has announced the establishment of UCSF's first Women's Resource Center and the appointment of Amy Levine as the Center's director.

As a valuable resource for the campus, the Women's Resource Center will:

- Provide a central source of information on campus programs, policies, resources and opportunities for women students, staff and faculty.
- Promote wider and more effective use of existing campus resources.
- Inform campus women of resources for women in the greater San Francisco Bay Area.
- Refer women to appropriate sources of information and support.
- Publicize and support existing campus programs for women.
- Encourage the development of new programs that would be useful to women on campus.
- Act as a liaison to campus, systemwide, community and national women's groups and service organizations.

Amy Levine, the new director of the Women's Resource Center, has been coordinator of the UCSF Rape Prevention Education Program for some four years and has extensive knowledge of women's issues, the UCSF campus and the women's community.

The Center is currently under renovation and scheduled to open in late March in the Office of Public Service Programs, 1308B 3rd Ave.

The UCSF Hospitals Auxiliary will honor Gerard Piel, president and publisher of *Scientific American,* at a benefit dinner on Thursday, April 5, at the Fairmont Hotel.

The dinner will raise funds for the Department of Ob/Gyn and Reproductive Sciences, which is nationally recognized for its contributions to improved health care for mothers and infants. The theme of the evening will be "Science in the Cause of Man," the title of one of Piel's books.

A member of the UCSF Board of Overseers, Piel is being honored for "bringing clarity and purpose to his deliberations in the great tradition of scientific humanism."

For tickets call Compass Associates at 929-1417.

The Third Milo E. Rowell Lecturer is to be Robert G. Petersdorf, vice chancellor for health sciences and dean, School of Medicine, UCSD.

Petersdorf, a widely recognized clinician and investigator in the fields of internal medicine and infectious disease, will present "Some Difficult Issues Facing Medicine" on Tuesday, April 17, at 5 p.m. in Milo E. Rowell Educational Building Auditorium, Fresno.

The lecture honors the late Milo E. Rowell, a prominent Fresno attorney who pioneered medical education in the Central Valley. The UCSF Fresno-Central San Joaquin Valley Medical Education Program, a clinical branch of the School of Medicine, organizes the annual lecture.

Malcolm Rowland, professor of pharmacy, University of Manchester, England, is to be the Sidney Riegleman Lecturer April 9, 10 & 12.

Rowland will present:

- "The Clearance Concept in Pharmacokinetics: Models and Implication." HSW 300. 4-5 p.m. Mon., Apr. 9.
- "Stereochemical Considerations in Pharmacokinetics and Pharmacodynamics: Studies with Warfarin." HSW 300. 4-5 p.m. Tues., Apr. 10.
- "Of Structure and Scale in Pharmacokinetics." S 214. 4-5 p.m. Thurs., Apr. 12.

Rowland, a founder and editor of the *Journal of Pharmacokinetics and Biopharmaceutics*, taught at UCSF's School of Pharmacy from 1966 to 1975.

The Sidney Riegleman Lecture series honors the late professor of pharmacy and pharmaceutical chemistry and associate dean for research services, School of Pharmacy, who died in 1981. A member of the UCSF faculty for 11 years, he was recognized as a world authority in pharmacokinetics.

The LPPI-UCSF Alumni-Faculty Association's Seventh Annual Meeting will be held Saturday, April 14, from 8:30 a.m. to 2 p.m. in the LPPI Auditorium.

The topic, "Feast or Famine: Clinical Approaches to the Treatment of Eating Disorders," was chosen in response to the tremendous media attention given the subjects of anorexia nervosa and bulimia, as well as a forum to highlight LPPI's new outpatient Eating Disorders Clinic and inpatient work.

The program will address the developmental, medical and biological aspects of eating disorders, individual and group psychotherapy treatments, the affective expression in eating disorders with emphasis on the role of shame and the family, and the social and cultural aspects of anorexia nervosa. New papers will be presented.

Speakers will include Iris R. Bell, director of the Eating Disorders Clinic; Lynn Ponton, assistant director of LPPI's Adolescent and Young Adult Inpatient Unit; Elaine Lonergan, group therapist; Richard Lieberman, LPPI outpatient leader; & Ellen Drever, clinical nurse specialist, Inpatient Psychiatry.

For further information and registration, call x77-395.

This year's Troy C. Daniels Lecturer is Britton Chance, director of the Institute for Structural & Functional Studies, and professor of biophysics and physical chemistry at the University of Pennsylvania.

On April 9, 11 & 13, Chance will present:

- "Genetic & Vascular Disease as Studied by 31P NMR in Neonates & Adults." Cole Hall. 11 a.m. Mon., Apr. 9.
- "31P NMR Studies of Exercise in Normal, Trained & Diseased Human Limbs." Cole Hall. 4 p.m. Wed., Apr. 11.
- "Structure of the Geminate State, MbCO & of Intermediate Forms of Cytochrome Oxidase." Cole Hall. 11 a.m. Fri., Apr. 13.

The Troy C. Daniels Lecture series honors the former dean of the UCSF School of Pharmacy, who has been a leader in the development of pharmacy and pharmaceutical education for more than 50 years.

The Sequoia String Quartet, a California-based chamber ensemble, will perform Thursday, March 29, at 8 p.m. in Cole Hall.

Included in the program will be the San Francisco premiere of "Sequoia," a new work by contemporary composer Paul Chihara. Other works include Quartet in G Major, Op. 77, No. 1 by Haydn and Quartet in B flat Major, Op. 51, No. 3 by Dvorak.

Tickets for the performance are $4 for UCSF students and Millberry Union members, $5 general.

This program is sponsored in part by the California Arts Council, the UCSF Committee for Arts & Lectures and the UC Intercampus Arts Program. For information call x2571.

The campus Police Department is currently providing a free fingerprinting service for children of campus employees and students.

The completed cards should be retained by the parents or guardian and submitted to the FBI or the investigating agency only when the child is missing.

This service is available at the campus Police Department every Friday from 9 a.m. to noon. To make an appointment, call Linda Smith, x1414.

A $250,000 donation to UCSF will help improve patient care for victims of cystic fibrosis, a tragic, always fatal lung disease, which usually strikes in childhood and kills most victims before the age of 21.

The gift, from National Medical Enterprises, Inc., a for-profit hospital and medical services chain based in Los Angeles, was presented to UCSF Chancellor Julius R. Krevans, MD, by National Medical Enterprises Vice-President James Livingston at a luncheon on February 7. Livingston also is a trustee of the UCSF Foundation and active in the UCSF Chancellor's Associates.

The donation will help establish the Cystic Fibrosis Clinical Center at UCSF. The Clinical Center will be a site for patient care and the training of physicians in modern therapy for cystic fibrosis, as well as a facility where new research discoveries can be applied to clinical care.

Brian Davis, MD, assistant professor of medicine at UCSF, will be clinical director of the Center.

The UCSF School of Dentistry was listed as the number-three graduate program in dentistry in the country in the 1983-84 Gourman Report. First was Harvard and second, University of Michigan.

The Reproductive Endocrinology Program in the Department of Ob/Gyn and Reproductive Sciences has received a three-year, $600,000 grant from the Andrew W. Mellon Foundation, bringing the total received by the Program to over $2 million.

The funding, for 1985-87, is for the support of promising young faculty and for training postdoctoral fellows in reproductive endocrinology.

The Reproductive Endocrinology Program is a leader in research and clinical therapies dealing with regulation of fertility, the endocrinology of pregnancy and the menstrual cycle, hormones and cancer, sexual development, and the transport and action of hormones.

UCSF researchers have been particularly successful in treating women who suffer from the disorder called hypothalamic amenorrhea—inability to ovulate or menstruate due to a malfunction of the hypothalamus. The team has used a portable, programmed pump which releases the hormone GnRH in pulses and triggers ovulation. Three women treated with the hormone have become pregnant and delivered healthy babies.

The reproductive endocrinologists have also opened an In Vitro Fertilization Clinic and are now accepting patients who suffer from infertility due to tubal disease and other factors.

The John B. Harris Awards Committee is seeking nominations for the 1984 Harris Award, presented annually to a UCSF graduating student who best exemplifies the qualities of the associate professor of medicine who died in 1973.

Harris, a dedicated scholar who contributed significantly to the teaching programs of the Department of Medicine, was active in the Civil Rights movement and interested in extending educational opportunities to disadvantaged students, particularly minorities.

Nominations are being accepted from members of the graduating classes of the schools of Dentistry, Nursing, Medicine, Pharmacy and the Graduate Division. Nomination forms are available in each student affairs office and should be sent to Marie Fox, SSB Upper Level, by Friday, April 20. For further information call x4436.

Hospital Administration is updating the list of employees who serve as "Volunteer Interpreters." If you speak Cambodian, Korean, Laotian or Vietnamese, and can offer your bilingual skills, please call Nancy Vega at x1401.

HONORS & AWARDS

David Agard, assistant professor, biochemistry: Recipient of a Presidential Young Investigator Award, one of only 25 in the biological sciences. The awards are part of a new program of federal research support designed to encourage links between industry and academia by matching donations from industry. Agard's research is in several areas of structural biology, though the award monies will be used primarily to study the relation between a protein's amino acid sequence and the way it folds up in three dimensions.

Frank Hinman, Jr., clinical professor, urology: Awarded the Benjamin Stockwell Barringer Medal for Outstanding Achievement from the American Association of Genito-Urinary Surgeons and made an honorary member at their annual meeting, March 3.

Calvin Zippin, professor, epidemiology, CRI, epidemiology & international health & pathology; and **Diana Lum,** associate director, general tumor registrars, CRI: Conducted a training program for tumor registrars, February 13-24, at the Regional Cancer Centre, Trivandrum, Kerala State, India.

Carl Grunfeld, assistant professor, medicine; co-director, Special Diagnostic & Treatment Unit, VAMC: Appointed the George Magid Lecturer for 1984 at Stanford School of Medicine, Santa Clara Valley Medical Center.

David Bracker, Community Health Program manager, Public Service Programs: Elected board officer to the newly incorporated Coalition of Agencies Serving the Elderly, Inc. (CASE).

Robert A. Fishman, professor and chair, neurology: Appointed to the National Advisory Council of the National Institute of Neurological and Communicative Disorders and Stroke. The term of appointment is 1984-1987.

Piero Mustacchi, clinical professor, medicine and preventative medicine: Awarded the commemorative medal of Sacra Domus Hospitalis S. Johannis Hierosolomitany in appreciation of his contribution to the Liberian National Leprosy Control Program.

Dale Houston, chief of rehabilitation; **Judy Bloomer** & **Susan Williams,** occupational therapists, LPPI: Awarded a grant of $3,200 from the American Occupational Therapy Foundation, Inc. to further standardize the Bay Area Functional Performance Evaluation.

IN MEMORIAM

Lucille G. Boole. An associate director of the Department of Social Work until her retirement in the early 60's, she was known as a moving force behind the development of the Social Work Program within the Department of Ob/Gyn. She came to the Department of Ob/Gyn in 1947 as a clinical social worker.

PUBLICATIONS

John M. Luce, assistant professor, medicine and anesthesia: Coauthor of *Intensive Respiratory Care* (W.B. Saunders Co., Philadelphia, 1984).

The Langley Porter Psychiatric Institute will hold a book sale Tuesday, April 3, from noon to 2 p.m. in the main lobby of LPPI. A variety of hardback and softcover books drawn from the Patients' Library, as well as books donated by staff, patients and friends of the Institute, will be on sale. Most books will be sold for 25¢ to 50¢ each.

Proceeds from the sale will be used to purchase additional books of current interest to the patients. Further donations are also needed. Donations may be brought to the Rehabilitation Therapies Office, LPPI 309, or call x77-427.

For the third year the School of Nursing is participating in the NIH Minority High School Student Research Apprentice Program, as part of its Biomedical Research Support Grant.

Two minority high school students will be chosen to help with a variety of research support activities, which include reviewing federal research grant information, assisting in the compilation of funding source information, inputting data from faculty projects into the computer, and assisting faculty with library searches.

Some 23 schools in the San Francisco Bay Area have been notified about the program.
